# **Section 4: FIRST AID MEASURES**

Description of First Aid measures:

**General Advice:** For advice contact the National Poisons Centre on 0800 POISON

(0800 764 766) or a doctor immediately. Begin artificial respiration if the victim is not breathing. Use mouth to nose rather than mouth to  $\,$ 

mouth. Obtain medical attention.

**If inhaled:** Move the victim to fresh air.

If breathing is irregular or stopped, administer artificial respiration.

Keep patient warm and at rest.

Call a Doctor or the National Poisons Centre immediately.

In case of skin contact: Take off all contaminated clothing immediately.

> Wash off immediately with plenty of water. If skin irritation persists, call a doctor. Wash contaminated clothing before re-use.

In case of eye contact: Rinse immediately with plenty of water, also under the eyelids, for at

least 15 minutes.

Remove contact lenses (if present). Immediate medical attention is required.

If swallowed: If swallowed seek medical advice immediately and show the container

or label.

DO NOT induce vomiting.

Important symptoms and effects, both acute and delayed:

Symptoms: No symptoms known or expected.

Indication of any immediate medical attention and special treatment needed:

There is no specific antidote available.

Treat symptomatically.

## **Section 5: FIRE-FIGHTING MEASURES**

Extinguishing media:

Suitable extinguishing media: Small fires:

Use water spray, alcohol-resistant foam, dry chemical or carbon

dioxide. Large Fires:

Alcohol resistant foam or water spray.

Unsuitable extinguishing media: Do not use a solid water stream as it may scatter and spread fire.

Special hazards arising from the substance or mixture:

Specific hazards during fire-

fighting:

As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of

combustion (see section 10)

Exposure to decomposition products may be a hazard to health.

Wear full protective clothing and self-contained breathing apparatus.

Advice for firefighters:

Special protective equipment for

firefighters:

**Hazchem Code:** 2X

**Further information:** Do not allow run-off from fire fighting to enter drains or water courses.

Cool closed containers exposed to fire with water spray.

# **Section 6: ACCIDENTIAL RELEASE MEASURES**

Personal precautions, protective equipment and emergency procedures

Refer to protective measures listed in Sections 7 and 8.

Avoid dust formation.

**Environmental Precautions:** 

Do not flush into surface water or sanitary sewer system.

If the product contaminates rivers and lakes or drains inform respective

authorities.

Methods and material for containment and cleaning up:

Contain spillage, pick up with an electrically protected vacuum cleaner or by wet-brushing and transfer to a container for disposal according to local regulations (see section 13).

Do not create a powder cloud by using a brush or compressed air.

Clean contaminated surface thoroughly. Clean with detergents. Avoid solvents.

Retain and dispose of contaminated wash water.

**Reference to other sections:** Refer to disposal considerations listed in Section 13.

Refer to protective measures listed in sections 7 and 8.

# **Section 7: HANDLING AND STORAGE**

Precautions for Safe handling:

**Advice on safe handling:**No special protective measures against fire required.

Avoid contact with skin and eyes. When using do not eat, drink or smoke. For personal protection see section 8.

Conditions for safe storage, including any incompatibilities:

Requirements for storage area

and containers:

No special storage conditions required. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs.

Specific end use(s)

**Specific use(s)** For proper and safe use of this product, please refer to the approval

conditions laid down on the product label.

## Section 8: EXPOSURE CONTROL / PERSONAL PROTECTION

#### **Control Parameters**

#### **Occupational Exposure Limits:**

Components	CAS No	Value type (form of exposure)	Control parameters	Basis
Kaolin	1332-58-7	TWA	10 mg/m <sup>3</sup> ; 2 mg/m <sup>3</sup> (respirable dust)	WES

**Exposure controls** 

**Engineering measures:** Containment and/or segregation is the most reliable technical

protection measure if exposure cannot be eliminated.

The extent of these protection measures depends on the actual risks in

use.

Maintain air concentrations below occupational exposure standards. Where necessary, seek additional occupational hygiene advice.

Personal Protective Protection:

**Eye protection:** Always wear eye protection when the potential for inadvertent eye

contact with the product cannot be excluded.

Hand protection:

Material: Chemical resistant, such as nitrile rubber

Break through time: >480 min
Glove thickness: 0.5 mm

**Remarks:** Wear protective gloves. The choice of an appropriate glove does not

only depend on its material but also on other quality features and is

different from one producer to the other.

Please observe the instructions regarding permeability and

breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

**Skin and body protection:** Choose body protection in relation to its type, to the concentration and

amount of dangerous substances, and to the specific work-place.

Remove and wash contaminated clothing before re-use.

Wear as appropriate:

Overalls

**Respiratory protection:** When workers are facing concentrations above the exposure limit they

must use appropriate certified respirators.

Suitable respiratory equipment: Respirator with a particle filter

The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used.

Filter type: Particulates type (P)

**Protective measures:** The use of technical measures should always have priority over the

use of personal protective equipment.

When selecting personal protective equipment, seek appropriate

professional advice.

Personal protective equipment should be certified to appropriate

standards.
